

Outpatient Therapy Services provides services by appointment only. Walk-ins are not accepted. If the provider would like the patient to be seen same day, please call the direct line to check for availability.

All orders need to include the following:

- Patient name
- Patient DOB
- Patient diagnosis with ICD-10 code
- Provider signature with date and time
- Medication name, dose, route, frequency

Services offered after receiving appropriate orders include:

- Intramuscular injections (Exam. Testosterone, B12, antipsychotics, Prolia, etc.)
- Subcutaneous injections (Exam. Allergy, B12, etc.)
- Infusions (Exam. Iron, hydration, immunotherapy, antibiotics, etc.)
- Blood transfusions
- Urinary
- Catheter insertion and care
- Port flush
- Blood draw via Port/PICC (standard blood draws, patients should use the lab)
- PICC line care, i.e. dressing changes, blood draws
- PICC line removal
- Staple removal
- Stitch removal
- Ostomy care
- Wound care
- Therapeutic phlebotomy
- Ketamine infusion for chronic pain patients
- Bone marrow aspiration (only after a consult with hematologist/oncologist)
- Oncology and hematology
- Chemotherapy infusions/injections/management

Some medications require a signed consent by the provider and patient before receiving treatment in Outpatient Therapy Services. If in doubt, please contact us and we will be happy to help. If there are any additional questions about the services we provide, please call our direct line.
