5 tips for getting the most out of a food label

BY KIRA WIGGINS, DIRECTOR OF THE WELLNESS CENTER AT SAN JOAQUIN COMMUNITY HOSPITAL

1 **Serving size.** Often what the manufacturer considers a serving is not what you will actually eat! Many packages may seem like one serving, but they are considered much more. A can of soup, for instance, is often labeled as two servings. Always remember: If the serving says ½ cup, but you eat 1 cup, you are getting double the calories, double the fat and double the sodium!

2 **Percent daily value.** You can use this as a quick, easy reference. If the percentage reads greater than 20 percent, you are getting a lot! If the percentage reads less than 5 percent, you are getting a little. Remember, this is referring to the serving size listed.

3 **Be careful about claims of “free.”** “Free” means “no amount of or trivial amounts of” the item, such as fat or sugar. In fact, a label may read “trans fat-free” or “sugar-free” if there is less than ½ gram per serving (their serving, not yours). This may be an item you eat three to four servings of at a sitting, and over a week, you might have 10 servings. Ultimately, you may have consumed 4 grams of artery-clogging trans fats in that week! And remember, “sugar-free” does not mean carb-free or calorie-free.

4 **Be cautious with the claim “reduced.”** This means the item contains 25 percent less than the original product. For example, a reduced-sodium soy sauce may contain 25 percent less sodium than original soy sauce, but it does not mean it is a low-sodium food.

5 **Always read the ingredient list.** If the item has more than 5 to 10 ingredients, it may be suspect. Watch for ingredients you cannot pronounce or do not recognize.

HEART ATTACK

Time makes a life-or-death difference

The Chest Pain Center at San Joaquin Community Hospital (SJCH) has once again earned full accreditation with PCI from the Society of Cardiovascular Patient Care (SCPC). The status was first awarded to SJCH in June 2009.

“Taking the initiative to continue being an accredited Chest Pain Center shows how dedicated we are to the health of our community,” said SJCH President and CEO Robert J. Beehler. “In today’s changing world, it’s vital that we continue to challenge ourselves to provide top-quality, all-inclusive care to the people of Bakersfield and Kern County. It’s a commitment we’ve made since being the first hospital in Bakersfield to perform open-heart surgery in 1972, and we continue to go the extra mile to maintain accreditations as a Chest Pain Center.”

This most recent accreditation is valid through November 2015. SJCH became the first hospital between Los Angeles and San Francisco to house both a Nationally Accredited Chest Pain Center and Nationally Certified Stroke Center.

BETTERING THE ODDS OF SURVIVAL

Heart attacks are a leading cause of death in the United States, and 600,000 people die annually of heart disease. More than 5 million Americans visit hospitals each year with chest pain. SCPC’s goal is to significantly reduce the mortality rate of these patients by:
✓ Teaching the public to recognize and react to the early symptoms of a possible heart attack
✓ Reducing the time that it takes to receive treatment
✓ Increasing the accuracy and effectiveness of treatment

The protocol-driven and systematic approach to patient management at the accredited Chest Pain Center at SJCH allows physicians to reduce time to treatment during the critical early stages of a heart attack, when treatments are most effective. The physicians are also better able to monitor patients when it is not clear whether they are having a coronary event.

Such observation helps ensure that patients are neither sent home too early nor needlessly admitted.

Employee generosity abounds

Once again, San Joaquin Community Hospital (SJCH) employees have amazed hospital leaders with their overwhelming generosity. The 2012 SJCH Employee Giving Campaign—benefiting The AIS Cancer Center at SJCH—raised an additional $312,000 in just six short weeks.

Of the 2,300-plus employees (not including physicians), 1,261—or 53 percent—made a donation to support our new cancer center. In a hospital of more than 70 departments, 45 departments achieved 100 percent participation.

Key to this year’s success were the 66 employee ambassadors, who served as frontline cheerleaders for the campaign. These volunteers went above and beyond their normal duties to assist their colleagues by:
✓ Answering questions about the campaign
✓ Collecting pledge forms
✓ Distributing tote bags given to each employee donor
✓ Providing the enthusiasm and energy that helped reach another extraordinary accomplishment in SJCH’s history

Combined with last year’s totals, SJCH employees have raised more than $812,000 toward The AIS Cancer Center Capital Campaign.

“I am so proud to be an employee and to join the many employees who made a sacrifice so that they could be a part of bringing comprehensive, hospital-based cancer care to our community,” said Kevin Burton, president and executive director of the SJCH Foundation. “I am grateful to each and every employee who helped with the campaign and made a gift—large or small.”

Bank of the Sierra supports NICU

Kevin Burton, president and executive director of the San Joaquin Community Hospital (SJCH) Foundation, and members of the hospital’s Neonatal Intensive Care Unit (NICU) hold a $1,500 check presented by Michael Olague, senior vice president and area manager of Bank of the Sierra. The funds will be used to purchase Snoedels, a sleeping and bonding aid for babies in the NICU at SJCH. Bringing comfort and reassurance, the Snoedels are specifically designed to absorb and retain a parent’s scent to help comfort our littlest patients. The generous grant supplies one for each NICU baby, and the family is welcome to take it home as a keepsake.
Physicians add their two cents—and more!

For the first time ever, the San Joaquin Community Hospital (SJCH) Foundation conducted an appeal centered solely toward physicians. The Physician Campaign focused on garnering support and raising awareness for The AIS Cancer Center at SJCH.

Each active physician at SJCH was invited to meet with the Foundation to learn more about The AIS Cancer Center and then invited to help bridge the financial gap that existed between the funding provided by the hospital and the cost of the new facility. Physicians have been overwhelmingly enthusiastic and supportive of this project, and the campaign was remarkably successful.

In all, more than $325,000 was secured in cash and pledges to help bring the new AIS Cancer Center to the campus of SJCH. Physicians were pleased to support what many referred to as a “vital and welcomed addition to our local community.”

Riding for cancer awareness

The Bakersfield Harley Owners Group (H.O.G. Chapter #1580), through its Ladies of Harley group, sponsored the 2012 Purple Thunder Cancer Ride on Sept. 29 to raise awareness and funds for The AIS Cancer Center at SJCH. The group donated $5,000.

PLATINUM STATUS

SJCH’s 2012 communication efforts are rewarded

The Marketing Department at San Joaquin Community Hospital (SJCH) is proud to announce a total of six prestigious awards.

SJCH received the Reger Smith Cutting Edge Award given by the Society of Adventist Communicators (SAC) during its annual convention in Albuquerque, N.M. The SAC convention honored almost 200 individuals and organizations for their outstanding work in the field of communication.

SJCH won for its “Men in Gowns” print advertisement in the special men’s health issue of Bakersfield Magazine in June 2012. The ad featured local military veterans dressed in ensembles that combined their service branch uniform with a hospital gown. The goal: to raise awareness during men’s health month, while also honoring the troops and soldiers who have served our country.

In the 2012 MarCom Awards competition, an international creative contest that recognizes outstanding achievement by marketing and communication professionals, the SJCH Marketing Department received:

✓ A Platinum Award for the summer 2012 issue of Health Matters in the category of Magazine/Nonprofit. This issue of SJCH’s quarterly publication, which is mailed to 70,000-plus Bakersfield homes, captured the emotional milestone of raising the final beam on The AIS Cancer Center.
✓ A Platinum Award for SJCH’s 2011 Annual Report, Words to Live By, in the Annual Report/Medical category. This year’s report featured a “word cloud” cover design, filled with inspirational terms that sum up SJCH’s philosophy in providing physical, emotional and spiritual care for its patients.
✓ A Gold Award, also for the 2011 Annual Report, but in this case, in the Annual Report Design (Print) category.
✓ Also, the hospital’s Human Resources’ Become brochure was given an Honorable Mention in the category of Brochure/Recruitment.

MarCom’s prestigious Platinum Award is presented to those entries judged to be among the most outstanding in the competition.

“These awards are a true honor. This is our first time earning platinum status in the MarCom Awards, and we received it twice, along with these other wonderful awards... we couldn’t be more pleased,” said Jarrod McNaughton, vice president of marketing and development at SJCH. “Our Marketing Department always produces high-quality publications to share with our community; to be recognized for that, at this competitive level, motivates us to raise the bar even more.”

SJCH’s Marketing Department also just learned it won a Merit Award from the National Health Institute for its Winter 2012 issue of Health Matters, which kicked off The AIS Cancer Center’s capital fundraising campaign.
The AIS Cancer Center at San Joaquin Community Hospital (SJCH) is both happy and proud to have announced its affiliation with the University of California at Davis Comprehensive Cancer Center.

“We have found an excellent partner with UC Davis that will only enhance the level of treatment and care we’ll be providing at The AIS Cancer Center at SJCH,” said Jarrod McNaughton, SJCH’s vice president of marketing and development. “Their program aligns perfectly with our vision for our new facility—we want only the best for our patients, and we have that with UC Davis.”

The UC Davis Health System Cancer Care Network is a unique partnership among cancer centers throughout Northern and Central California, working together to offer first-rate, leading-edge cancer care in their communities.

Patients benefit from the nationally recognized academic expertise and research of the National Cancer Institute-designated UC Davis Comprehensive Cancer Center, combined with the personal relationships and unique insights of their community cancer centers. They also have access to the latest approaches for diagnosis and treatment while surrounded by the support of family and friends close to home.
United by collaboration
Cancer Care Network cancer centers provide advanced cancer care for both common and rare conditions. The UC Davis cancer program emphasizes multidisciplinary collaboration: Teams of medical and radiation oncologists, chemotherapy-certified oncology nurses, nutritionists, counselors, and other support staff at Cancer Care Network member centers work together to address each patient’s unique care needs.

Expertise linked by technology
Teams of specialists from member cancer centers use UC Davis’ state-of-the-art telehealth technology to meet remotely, giving patients throughout California access to expertise. Using secure videoconferences, physicians and specialists share medical information, agree on treatment plans, and assess the needs and opportunities for additional resources, such as treatments available through clinical trials or referrals to UC Davis for specialty care.

Virtual tumor boards
Virtual tumor boards involve a variety of medical specialists throughout the Cancer Care Network who come together to discuss the best treatments for individual patients. The American College of Surgeons Commission on Cancer—a national medical accreditation body—recognizes tumor boards as an essential component of excellence in cancer care.

Physicians are able to draw on experiences with their own patients, tap specific or unique expertise of different members of the care team, and explore options for clinical therapies. All the while, patients benefit from the collective experience of several specialists and powerful research from a nationally renowned academic medical center.

Access to clinical trials
Clinical trials help cancer researchers understand complex diseases and develop new treatments and medications to help manage them. Trials are designed to offer the best possible care while answering specific medical questions.

For patients, this can be an opportunity to access the newest and most advanced treatments before they are widely available. Patients may decide to participate in clinical trials because they hope for a cure, a longer lifespan or an improved quality of life. Or they might hope their participation will benefit other cancer patients in the future.

UC Davis offers more than 200 cancer clinical trials at any one time—all with the goal of bringing new, effective and safe treatments to patients more quickly. Many of these treatments are available to patients through the UC Davis Health System Cancer Care Network.

For more information, visit cancercarenetwork.ucdavis.edu or www.SJCH.us/cancercare.

A few facts
The AIS Cancer Center at San Joaquin Community Hospital (SJCH):
✓ Is a comprehensive, hospital-based cancer center in Kern County.
✓ Includes access to the inpatient unit at SJCH.
✓ Offers highly trained and experienced physicians who are board-certified in oncology care.
✓ Provides radiation oncology, medical oncology and an outpatient surgery center all under one roof.
✓ Provides a cancer registry that offers lifelong patient follow-up.
✓ Provides a family-centered approach in a beautiful center with the latest information on cancer care and research, including the Wendy Wayne Resource Library.
✓ Offers one-stop services, including screening, diagnosis and treatment. Because the center will have everything available on the same campus, care for the patient will begin immediately, with the shortest amount of wait time possible between diagnosis and treatment.
✓ Will be LEED Certified—a green certification given by the U.S. Green Building Council. LEED Certified buildings must offer the most efficient, high-quality design and build standards available. The AIS Cancer Center is the first LEED health care project in our area.

Sacred Work
✓ SJCH is a not-for-profit, faith-based hospital. As part of Adventist Health, SJCH believes in whole-person care. We view Sacred Work—where need is met with love—as an essential element in the healing process.
✓ The AIS Cancer Center will be an extension of SJCH’s Sacred Work approach to care.

Why now?
✓ Nearly 20 percent of cancer patients leave Kern County for treatment.
✓ This area has a growing population that experiences some of the highest rates of cancer in the state of California.
✓ Our region is affected by five types of cancer at higher rates than the national average.

To learn about volunteer opportunities at The AIS Cancer Center, call 661-869-6559.
The festivities kicked off with a VIP gala on Saturday evening, held inside a huge party tent that was transformed into a red, silver and black holiday fantasy. About 500 guests were treated to pre-dinner program hors d’oeuvres and early tours of the new four-story facility, located directly across the street from SJCH at 2620 Chester Ave.

This was followed by a grand night of thank-you presentations and speeches to all the parties responsible for The AIS Cancer Center, ranging from the entire SJCH family to the additional support received from donors, physicians, builders, construction teams, designers and various contractors, along with support from local government officials, community leaders and local business representatives.

As Robert J. Beehler, SJCH’s president and CEO, put it: “We believe it’s our job at San Joaquin Community Hospital to invest in our community and fill the gaps in local health care. So we spent a lot of time listening to you, our community, and found out more about the statistics of cancer care here and that people were leaving town for treatment.”

In fact, SJCH learned that approximately 1 in 5—or 20 percent—of Kern
County residents seek cancer treatment outside the area. With a strong belief that cancer is the kind of battle best fought with a home field advantage—one where family and friends can easily serve as a nearby support network—SJCH put into motion a plan: to bring world-class cancer care to Bakersfield.

Some 18 months later, The AIS Cancer Center—a four-story, 60,000-square-foot facility that includes radiation oncology, medical oncology and an outpatient surgery center—is a reality. As the center’s motto states: World-class cancer care, centered on you.

The center is also now partnered with University of California at Davis Medical Center, an affiliation that will bring even more cancer care advances to Kern County. The official announcement of this partnership was made public Jan. 11 (see pages 4 and 5 for additional details on what this development will mean for local cancer patients).

**A time to celebrate**

“It’s a very exciting time in SJCH’s history,” said Jarrod McNaughton, vice president of marketing and development. “We have

Continued on page 10
Now is not the time to stop giving

While the capital campaign has come to a close, The AIS Cancer Center welcomes ongoing support of its programs and services through charitable gifts to the SJCH Foundation.

In addition, there are departments throughout the hospital that benefit greatly from gifts received from the community. Because of community support, SJCH is now the proud home of the world-renowned Grossman Burn Center and Kern County’s new comprehensive, hospital-based cancer center.

If you are interested in learning more about the exciting plans for SJCH and how you can help, please contact the Foundation at 661-869-6570.

It’s a wrap!
Continued from page 9

had many firsts, and all have been significant milestones for us and the community in which we live. But bringing a cancer center of this caliber and the caregivers that go along with that—well, this is a time to celebrate.”

Other speakers at the gala event were in full agreement!

“We’re a close-knit family; we like to celebrate each other’s accomplishments,” said Scott Reiner, executive vice president and chief operating officer of Adventist Health and SJCH Governing Board president.

Bakersfield Mayor Harvey Hall recalled another significant step in bridging a health care gap locally. “I remember the opening of The Grossman Burn Center at SJCH, which brought world-class burn care to our community—and here we go again,” he said.

Honoring leaders
A special tribute was paid to Wendy Wayne, a well-known community leader who also served as the project coordinator for The AIS Cancer Center prior to losing her second battle with non-Hodgkins lymphoma in June 2012. Wayne’s niece, Ann Reiner, spoke in her honor, telling the audience how much this project and the entire community of Bakersfield meant to her aunt. A musical tribute was then performed by SJCH’s own McNaughton and Sandy Johnson, executive director of mission and culture, who sang one of Wayne’s favorite songs, “Thankful.”

Also, in a special surprise moment, Beehler’s professional and personal commitment to raising the bar on local health care received formal recognition. With the unveiling of an artist’s rendering, everyone learned that a space in the new AIS Cancer Center will forever be known as The Robert & Myrna Beehler Exam Room, after Beehler and his wife. The couple was genuinely caught off guard by the gesture, especially when receiving an impromptu standing ovation.

The guest of honor in 3-D
The dinner program was followed with a very special outdoor light show extravaganza that highlighted the evening’s “guest of honor”: The AIS Cancer Center building itself. Attendees were asked to head out to the parking lot area, where they were treated to a jaw-dropping presentation.

Since this comprehensive, hospital-based cancer care facility represents yet another milestone in Kern County, it seemed only fitting that SJCH brought a unique form of entertainment known as 3-D projection mapping. The technology involves taking a completely customized,
Looking ahead

Now, as The AIS Cancer Center at San Joaquin Community Hospital (SJCH) begins to treat local cancer patients, bringing the latest technology and highly trained, board-certified oncology doctors, it is time for the hospital to continue its forward-thinking ways.

As a nonprofit community hospital, SJCH’s growth is bolstered by receiving financial support from the community. With a new year, the SJCH Foundation will continue to focus on connecting with donors who, through their incredible generosity, are helping the hospital live its mission and realize its vision.

Kevin Burton, the SJCH Foundation’s president and executive director, helps to align the philanthropic wishes of donors with the mission and vision of SJCH.

“We are always excited to meet with patients, their families, and individuals and businesses throughout our community who are interested in supporting our hospital by giving to the Foundation,” he said. “The $5.9 million we raised toward The AIS Cancer Center shows the generosity found here. It is through this generosity that we are able to help fund innovative programs and services provided by the hospital.”

As for the big VIP gala, Burton said he was delighted with the opportunity to celebrate this achievement and to thank everyone who made The AIS Cancer Center possible.

“It was a great night, a time to truly be grateful for this unbelievable facility,” Burton said. “Even more, this special weekend was a time to express only the best for the people who will be helped by The AIS Cancer Center and for the caregivers who will be making a real difference in so many lives.”

computer-animated film, including 3-D special effects, and projecting it onto the façade of a building; in this case, The AIS Cancer Center’s west-facing side—all four stories of it!

This 3-D projection mapping show was produced by ON Media Group of Phoenix, Los Angeles and Minneapolis. ON Media Group is a full-service experiential and digital outdoor advertising agency helping to capture audiences when and where they least expect it. One of the company’s co-founders is a former co-creative/technical director for Disney.

The 3-D projection mapping show offered the perfect opportunity to highlight donors, who helped us raise nearly $6 million during our Capital Campaign. In fact, the show ended with rolling credits that included a list of major contributors, many of whom were in attendance at the event.

The light show was repeated four more times the following evening, Sunday, Dec. 9, as a communitywide celebration took place during an open-house gathering from 3 to 7 p.m. The public was invited to attend this free event that also featured more guided tours, a health fair, craft activities, face painting, strolling magicians and balloon animal makers, yummy treats, and more!

If you missed the amazing light show at our grand opening, scan this code with your smartphone to see the video.
The positive effects of light, image, sound

The AIS Cancer Center at SJCH offers Ambient Experience, which will create a relaxing environment for patients undergoing imaging and radiation therapy procedures.

**ROYAL PHILIPS ELECTRONICS** announced the 500th order of its Ambient Experience hospital solution, reaching a milestone after sales of these patient-centered clinical environment installations started.

San Joaquin Community Hospital (SJCH) has installed a Big Bore CT treatment planning room with Ambient Experience for its new AIS Cancer Center. In addition, two of the center’s radiation therapy treatment rooms will also feature this concept to create calming atmospheres that help patients cope with the stresses involved in being diagnosed and treated for cancer—a disease that more than 1 in 3 people in the Western World get at some point in their lifetime.

“When I first learned about Philips’
Philips’ Ambient Experience was on display at the 98th annual meeting of the Radiological Society of North America (RSNA), Nov. 25 to 29, 2012. For more information, please visit the Philips RSNA News Center at www.philips.com/RSNA.

Ambient Experience concept, I immediately realized that it could be something that would really set our cancer center apart,” said Sam Itani, SJCH vice president of support services. “The focus on combining careful attention to the patient experience with attention to the needs of our staff makes this a win-win for everyone. I am looking forward to delivering a whole new standard of care for our patients.”

**What is it?**
Ambient Experience solutions feature the imaginative use of dynamic light, images and sound to place patients in a calming, reassuring and relaxing environment. By giving patients personalized control over the theme selection that defines the color and intensity of the ambient lighting as well as the audio/video content in the room, the patients’ involvement and engagement in procedures is encouraged.

Through skillful architectural and interior design, examination and treatment rooms are de-cluttered so that patients feel less overwhelmed by technologically complex medical equipment and procedures.

The benefits extend not only to patients. Philips’ Ambient Experience environments have been shown to decrease the duration of procedures, while also helping caregivers to work more efficiently and with more satisfaction.*

**Creating patient-friendly rooms**

“Achieving a milestone figure of 500 Ambient Experience orders within six years of the concept’s commercial launch is a remarkable achievement, especially when you consider that each one is a customized solution,” said Greg Sebasky, CEO of customer services at Philips Healthcare. “We have seen an increased demand for our Ambient Experience solutions in the past year, which is clear proof of a growing global awareness of the importance of the patient experience. The increased customer demand reflects the reality that patient-friendly, comforting environments are not only beneficial for patients but also for hospitals.”

There is an increasing body of evidence to suggest that patient-friendly, comforting environments not only reduce anxiety levels but also promote the healing process itself. Philips is a pioneer in the ambient healing environments domain with Ambient Experience, a solution incorporated in medical imaging rooms, the imaging preparation room (specifically for PET/CT and PET/MR), treatment rooms and emergency departments.

The first Ambient Experience room was installed in 2005 at the Advocate Lutheran General Children’s Hospital in Chicago. The commercial Ambient Experience program was officially launched in 2007 in the United States, and it was gradually expanded to Europe and growth geographies such as China and the Middle East. To date, Ambient Experience has been installed in 50 countries across the world and now, here in Bakersfield, Calif., at The AIS Cancer Center!

* A dedicated Ambient Experience installed base survey—100 customers interviewed in 27 countries (excluding the United States)—from September 2011 showed the following results: 76 percent see an increase in staff satisfaction, 4 percent (3 minutes per hour) overall decrease in procedure duration, and 6 percent (5 patients per week) overall patient increase.

AIS CANCER CENTER CAMPAIGN

Thank you to all of our donors!

Funding from the following donors provided the resources to expand the services at the AIS Cancer Center:

- Advanced Industrial Services
- The Cornforth Family
- Crothall Healthcare
- Wayne and Lynn Deats Family
- Itani Design Concepts
- Don C. and Diane S. Lake Family

We would like to thank our major donors for their support of our AIS Cancer Center campaign:

- Larry and Christina Frank Family
- M. Brandon Freeman, MD, PhD, PC
- Drs. John and Valerie Garcia
- John and Karen Garner
- Kenneth and Donna Gibb
- Clark and Pam Gustafson
- Rob and Debbie Hankins
- Dr. Hormuz and Mrs. Rhoda Irani
- Sam and Ghina Itani
- Carol and Jan Jarrett, Jarrett Electric
- Brian and Mary Komoto
- Joe and Suzan MacIvaine
- Nolan and Christina Maupin
- Jarrod and Heidi McNaughton
- Mendiburu Magic Foundation
- Godofredo G. Miranda, MD, and Lilibeth Guinto-Miranda, MD
- Michael and Georgia Moore Family
- Pacific Health Education Center
- Pyramid Oil Company
- Quest Imaging
- Scott and Margo Reiner
- Resnick Foundation
- Paulette Y. Saddler, MD, and Oscar E. Streeter Jr., MD
- Frank and Martha Samora
- In memory of Joyce Satterfield
- In honor of Dr. Keith Seidenstricker
- Brent Soper
- Mr. Barry and Dr. Irene Spinello
- Swinerton Builders
- Sandys Tang, MD
- Bob and Carolyn Temple Family
- The Thoernburgh Family
- Valley Anesthesia Associates Inc.

Thank you to our naming donors:

- Brad and Elizabeth Peters Family
- S.C. Anderson Inc.
- In memory of Jeannette S. Townsend

Thanks to the 1,832 employees who gave $812,343 (2011–2012) in support of the AIS Cancer Center. We couldn’t have done this without your leadership!

Thanks to all the physicians who participated in our Physician Campaign.
