

Acute Care Nursing Assistant Academy

The Acute Care Nurse's Aide (NA) paid training program at Adventist Health Castle offers hands-on training to successfully transition applicants into a Nurse Aide role. The program includes classroom curriculum, simulation for skills practice and testing, and on-the-job training in clinical units. Students learn essential skills such as obtaining vital signs, bathing, grooming, positioning, toileting, ambulating, and other aide duties. The program also covers legal rights, communication, safety, observation, reporting, and assisting individuals in maintaining basic comfort, independence, and safety. After completing the course and clinical hours, participants will receive a certificate of professional development from Windward Community College and transition into an acute care nurse aide role at Adventist Health Castle.
