Adventist Health Overview

Adventist Health Hanford & Selma are an affiliate of Adventist Health, a faith-based, nonprofit integrated health system serving more than 80 communities on the West Coast and Hawaii.

OUR MISSION:
Living God's love by inspiring health, wholeness and hope

OUR VISION:
Adventist Health will be a recognized leader in mission focus, quality care and fiscal strength.

Adventist Health entities include:

- 21 hospitals with more than 3,200 beds
- More than 280 clinics (hospital-based, rural health and physician clinics)
- 13 home care agencies and seven hospice agencies
- Four joint-venture retirement centers
- Compassionate and talented team of 35,000 associates, medical staff physicians, allied health professionals and volunteers

We owe much of our heritage and organizational success to the Seventh-day Adventist Church, which has long been a promoter of prevention and whole person care. Inspired by our belief in the loving and healing power of Jesus Christ, we aim to bring physical, mental and spiritual health and healing to our neighbors of all faiths. Every individual, regardless of his/her personal beliefs, is welcome in our facilities. We are also eager to partner with members of other faiths to enhance the health of the communities we serve.

Our commitment to quality health care stems from our heritage, which dates back to 1866 when the first Seventh-day Adventist health care facility opened in Battle Creek, Michigan. There, dedicated pioneers promoted the “radical” concepts of proper nutrition, exercise and sanitation. Early on, the facility was devoted to prevention as well as healing. They called it a sanitarium, a place where patients—and their families—could learn to be well.

More than a century later, the health care system sponsored by the Seventh-day Adventist Church circles the globe with more than 170 hospitals and more than 500 clinics, nursing homes and dispensaries worldwide. And the same vision to treat the whole person—mind, body and spirit—continues to provide the foundation for our progressive approach to health care.
Dear friends and Colleagues,

For more than 100 years, Adventist Health has provided faith-based, whole-person care to the more than 75 communities we serve in California, Hawaii, Oregon and Washington. Our mission of “Living God’s love by inspiring health, wholeness and hope” informs every plan we make and every action we take. Our efforts are guided by the understanding that our patients are our friends, family and neighbors, and we will care for them with dignity and respect.

The Community Health Plan is one way we put our mission into action. Each year, we review and update our Community Health Needs Assessment to ensure that our services at Adventist Health in Hanford, Selma, Reedley and more than 20 other rural communities across the San Joaquin Valley, meet the needs of our communities.

Because the people we serve are diverse and live within differing geographic areas, we depend on our communities and community partners to help us identify the most pressing health needs. By using existing resources and developing educational outreach that focuses on those needs, we can improve health outcomes for everyone.

Together, we can stop the root causes of preventable conditions, such as diabetes and obesity, and build healthier communities. We can also build relationships that support our communities in times of need.

We hope you’ll join us in creating a community that we can all be proud of.

Sincerely,

Andrea Kofl,
President, Adventist Health – Central Valley Network
Hospital Identifying Information

Adventist Health Hanford

Number of Beds: 142
Mailing Address: 115 Mall Drive, Hanford CA 93230

Invitation to a Healthier Community

Fulfilling the Adventist Health Mission

Where and how we live is vital to our health. We recognize that health status is a product of multiple factors. To comprehensively address the needs of our community, we must take into account health behaviors and risks, the physical environment, the health system, and social determinants of health. Each component influences the next and through strategic and collective action, improved health can be achieved.

The Community Health Plan marks the second phase in a collaborative effort to systematically investigate and identify our community’s most pressing needs. After a thorough review of health status in our community through the Community Health Needs Assessment (CHNA), we identified areas that we could address through the use of our resources, expertise, and community partners. Through these actions and relationships, we aim to empower our community and fulfill our mission, “Living God’s love by inspiring health, wholeness and hope.”

Identified Community Needs

The results of the CHNA guided the creation of this document and aided us in how we could best provide for our community and the most vulnerable among us. In 2018, we updated our focus areas in response to the preliminary data from our 2019 CHNA. As a result, Adventist Medical Centers Hanford and Selma have focused on the following priority areas for our community health investments 2019:

- Access to Care
- Obesity/ Healthy Eating Active Living (HEAL)/ Diabetes
- Mental Health
- Economic Security/ Homelessness
- Maternal and Infant Health

Additionally, we engage in a process of continuous quality improvement, whereby we ask the following questions for each priority area:

- Do our interventions make a difference in improving health outcomes?
- Are we providing the appropriate resources in the appropriate locations?
- What changes or collaborations within our system need to be made?
- How are we using technology to track our health improvements and provide relevant feedback at the local level?
- Do we have the resources as a region to elevate the population’s health status?

Building a healthy community requires multiple stakeholders working together with a common purpose. We invite you to explore how we intend to address health challenges in our community and partner to achieve change. More importantly though, we hope you imagine a healthier region and work with us to find solutions across a broad range of sectors to create communities we all want for ourselves and our families.
Connecting Strategy and Community Health

As hospitals move toward population health management, community health interventions are a key element in achieving the overall goals of reducing the overall cost of health care, improving the health of the population, and improving access to affordable health services for the community both in outpatient and community settings. The key factor in improving quality and efficiency of the care hospitals provide is to include the larger community they serve as a part of their overall strategy.

Health systems must now step outside of the traditional roles of hospitals to begin to address the social, economic, and environmental conditions that contribute to poor health in the communities we serve. Bold leadership is required from our administrators, healthcare providers, and governing boards to meet the pressing health challenges we face as a nation. These challenges include a paradigm shift in how hospitals and health systems are positioning themselves and their strategies for success in a new payment environment. This will impact everyone in a community and will require shared responsibility among all stakeholders.

Population health is not just the overall health of a population but also includes the distribution of health. Overall health could be quite high if the majority of the population is relatively healthy—even though a minority of the population is much less healthy. Ideally such differences would be eliminated or at least substantially reduced.

Community health can serve as a strategic platform to improve the health outcomes of a defined group of people, concentrating on three correlated stages:

1) The distribution of specific health statuses and outcomes within a population;
2) Factors that cause the present outcomes distribution; and
3) Interventions that may modify the factors to improve health outcomes.

Improving population health requires effective initiatives to:

1) Increase the prevalence of evidence-based preventive health services and preventive health behaviors.
2) Improve care quality and patient safety.
3) Advance care coordination across the health care continuum.

Our mission as a health system is Living God’s love by inspiring health, wholeness and hope, we believe the best way to re-imagine our future business model with a major emphasis of community health is by working together with our community.
2019 Community Benefit Inventory

In 2018, Adventist Health Hanford and Selma started working on our 2019 Community Health Needs Assessment and identified the need to shift focus to new priority areas. These new areas are explained in more detail in the 2019 CHNA. However, based on our continuous feedback and quality improvement efforts, we shifted our 2019 focus areas to reflect our new information. The prioritized needs were chosen based on community health data and the voices of our community. Working together with our community is key to achieving the necessary health improvements to create the communities that allow each member to have safe and healthy places to live, learn, work, play, and pray. Below you will find an inventory of interventions supporting the health of our communities.

Priority Need – Access to Care

Intervention: Adventist Health contracts with transportation vendors to provide round trip transportation to our clinics for patients that do not have transportation and would otherwise not be able to attend their necessary medical appointments. These rides help prevent appointment no-shows and increase access to care for our patients. Round trip transportation is provided for patients to our Physician’s Network offices in Hanford and our Rehabilitation Therapy office.

  o Number of Community Members Served: 523

Intervention: Access to care is limited in our region due to a shortage of healthcare providers, including physicians, nurse practitioners and physician assistants. Recruitment of providers and specialists is critical to meeting the healthcare needs of our patients and rural communities.

  o Number of Providers Added: 3

Intervention: Across our Central Valley Network, we partner with local junior colleges and universities to allow nursing students to come to our hospitals for their clinical rotations. These program partnerships allow LVN and RN nursing students to gain hands-on experience close to home, making it easier for many students to complete their education and become licensed providers.

  o Number of Community Members Served: 343: Adventist Health Hanford and Selma partner with Kings Partnership for Prevention to provide ongoing access to the Healthy Communities Institute online. This data sharing platform allows access to information that community partner organizations can use to bring more resources to our communities and to our patients.

Partners

Priority Need – Obesity/ Healthy Eating Active Living (HEAL)/ Diabetes

Intervention: Diabetes Among Friends, a five-week diabetes self-management education (DSME) curriculum in English and Spanish from Scripps University, debuted in our rural health clinics in July 2017. This program is approved as a (DSME) Program by the American Diabetes Association and covers all diabetes self-management topics including understanding blood sugars, nutrition, physical activity, medication management, stress management, foot care, ongoing screening tests and exams, etc.

- Number of program graduates: 42

Intervention: Athletic Training and sports physicals- partnership with local schools to provide sports physicals and injury prevention at high school games. The goal is to increase physical activity amongst youth and prevent injuries in an effort to combat obesity.

- Number of student athletes served: 9,870

Intervention: Adventist Health provides healthy eating and active living education at free public outreach events, often partnering with community organizations and school districts. The goal is to increase awareness of how to incorporate healthy eating and active living behaviors into daily life in an economical and practical way.

- Number of Community Members Served: 486

Intervention: Our Nutritional Services department provides the meals for the Kings County Commission on Aging Senior Meal Program which includes meals at congregate sites in Hanford, Corcoran and Avenal. They also provide frozen meals for the Meals on Wheels Program.

- Number of Community Members Served: 35,477

Partners

Program Highlight

One of our newly diagnosed Spanish speaking patients took our Diabetes Among class. This young adult had acquired some bad eating habits in addition to a sedentary lifestyle. This participant not only attended all the classes but brought their family to all the classes too. Throughout the class, he grew more confident. He was interactive in class, asked questions and set SMART goals that helped implement lifestyle changes that once seemed impossible into doable everyday activities. By the time the course came to an end, this individual was living a healthier life and feeling much better. Since graduating from this class, his blood sugar control continues to improve and has seen a significant decrease in his HgbA1c levels.

Priority Need– Mental Health

Intervention: Adventist Health partners with Kings United Way for promoting 2-1-1 and the 2-1-1 Intelliful® mobile app in our Kings and Tulare County clinics and patient care areas. 2-1-1 connects people in need to resources in the community available to them—including mental health, substance abuse and homelessness resources. Anybody can access 2-1-1 by phone in any of our service areas. In Kings and Tulare counties, the Intelliful app as well as text to chat options are available.

Intervention: Hosting education sessions for providers and community partner agencies on topics including Adverse Childhood Experiences (ACES) and on the dangers of social media to our youth to highlight potential risk factors that children and young adults are facing, as well as offer solutions to providers to intervene, provide appropriate support for victims and to prevent abuse.

- California Health Collaborative
- Hanford Joint Union School District
- Kings County District Attorney’s Office
Priority Need – Economic Security/ Homelessness

Intervention: Recuperative board and care is offered through our partnership with Kings Gospel Mission for 90 days to our homeless or inadequately housed patients. Patients who are homeless and have substance abuse or mental health issues receive wrap-around care while they heal. Throughout 2019, 38 individuals were admitted to the 90-day program and 25 were discharged from this program into stable permanent supportive housing.

  o Number of homeless patients assisted: 38

Intervention: Working in collaboration with the Kings County Wellness Bridge, we were able to assemble and distribute emergency homeless backpacks that included critical items like flashlights, bug spray, ponchos, socks, toothbrushes and other hygiene items.

  o Number of homeless patients assisted: 250

Intervention: The homeless discharge planning process, as required by SB 1152, ensures that all homeless patients who come to the hospital for care are provided with and connected to any and all needed resources. This includes providing meals, clothing, and connections with local case management programs and shelters.

  o Number of Community Members Served: 1,421

Intervention: UCSF- Fresno Doctors Academy in collaboration with our hospital and clinic providers, offers opportunities for local and at-risk high school students to shadow a physician in the healthcare setting. The goal is to inspire these high school students to engage with STEM studies and focus towards a career in healthcare.

  o Number of student participants Served: 7

Intervention: Bringing Broken Neighborhoods Back to Life is a partnership with local Selma faith and community-based organizations. Monthly events include connection with local resources for addressing the social determinants of health, health education and food bank distributions.

  o Number of Community Members Served: 150

Program highlight

Our program highlight comes from a hardworking collaboration between Adventist Health and the Kings Gospel Mission. Homelessness is an issue that strikes at the heart of the community. With increasing point-in-time counts, we are often left feeling defeating as we try to accommodate and provide much needed services to our community members. The Kings Gospel Mission, which aims to transform lives by providing a sense of belonging, purpose and community, is a critical partner in these efforts. Realizing that there is no one-size-fits-all approach to combatting homelessness and not one organization or industry can provide the answers we need. We must all play a role in developing and implementing solutions. Throughout our partnership with the Kings Gospel Mission, one of the biggest successes has been the development of the Mobile Shower Unit. To date the Mobile Shower Unit has been driven and accessed throughout Kings County and has provided more than 6,000 showers. As we move forward without partnership with the Kings Gospel Mission, it is our hope to continue expanding and reaching our most vulnerable populations.

Priority Need – Maternal and Infant Health

Intervention: Our Birth Center in Hanford provides birthing and breastfeeding classes for pregnant women in the community. These classes prepare pregnant women and their support partner in the birth process, with what to expect and much needed support for breastfeeding. There is a fee which is waived based on need.
  
  o Number of Community Members Served: 126

Intervention: Car safety seat checks are conducted by our certified car safety seat technicians in the Security department. These safety seat checks make sure that the car seat is current and appropriate for the child. They also check to make sure the safety seat is properly installed in the vehicle. These checks are provided at no cost at hour hospitals and clinics.
  
  o Number of Community Members Served: 18

Intervention: Safe Kids Day. Throughout Kings County, 1st grade students are bussed in and able to interact with local community members on best practices to staying safe and increasing overall wellness. In 2019, Adventist Health provided education on teeth brushing and also provided free toothbrushes to all students and teachers in attendance.
  
  o Number of students reached: 800

Other Community Benefit Activities

Intervention: Respiratory Warriors Support Group—a monthly support group for those living with chronic lung disease including asthma, COPD, pulmonary fibrosis, sleep apnea, allergies and any other lung health issue. Each month provides an opportunity for members to connect and catch up with each other while learning about resources and health topics that will help them lead healthier lives.
  o Number of Community Members Served: 84

Intervention: Inspire Hope, a partnership with World Vision, allows us to distribute new-returned merchandise from Costco to community-based organizations that can utilize the items to improve the health and lives of those who live in our communities. Each month, a semi-truck delivers goods to the hospital storage area and items delivered are distributed to community partner agencies as appropriate. Items include everything from diapers, food, furniture, clothing, appliances, and more. Each delivery is a surprise, but our community partners are always happy to receive what we can give.
  o Number of Community Members Served: 37,817

Intervention: Community Sponsorship & Annual Partnership Program is designed to support community-based programs, activities or events that align the hospital’s mission and address a community need. Our top priorities include: Access to Care, Obesity/ Healthy Eating Active Living (HEAL)/ Diabetes, Mental Health, Economic Security/Homelessness and Maternal & Infant Health.

Changes in 2020

While 2020 is our first year of implementation of community benefit strategy around our most recent Community Health Needs Assessment (CHNA), COVID 19 has changed our world in ways that our community never imagined possible. Unemployment has skyrocketed, leading to an increased risk of homelessness, increase food insecurity and increased mental health challenges. The closure of gyms and locations for physical activity and sheltering inside has led to decreased activity levels and increased weight for so many. And all hospitals had to halt elective surgeries and transition outpatient visits to telehealth, leading to an increased gap in access to care for those who lack online access at home and who were waiting for elective surgeries to improve quality of life. COVID 19 has brought immediate needs and changes to the challenges that were already facing our communities. 2020 and possible 2021 community benefit activities have shifted to addressing immediate needs of our communities. We continue to partner with local agencies to identify needs and find meaningful solutions as quickly as possible. This will be documented in great detail in our 2020 Annual report.
Community Benefit

Our community benefit work is rooted deep within our mission, with a recent recommitment of deep community engagement within each of our ministries.

We have also incorporated our community benefit work to be an extension of our care continuum. Our strategic investments in our community are focused on a more planned, proactive approach to community health. The basic issue of good stewardship is making optimal use of limited charitable funds. Defaulting to charity care in our emergency rooms for the most vulnerable is not consistent with our mission. An upstream and more proactive and strategic allocation of resources enables us to help low-income populations avoid preventable pain and suffering; in turn allowing the reallocation of funds to serve an increasing number of people experiencing health disparities.
