

## Adventist Health Hanford & Selma 2020 Community Health Implementation Strategy

## Executive Summary

### Introduction & Purpose

Adventist Health Hanford & Selma is pleased to share its Community Health Implementation Strategy. This follows the development of its 2019 Community Health Needs Assessment (CHNA) in accordance with requirements in the Affordable Care Act and IRS 990 Schedule H requirements and approved by the Adventist Health Board of Directors on October 17, 2019.

After a thorough review of the health status in our community through the community health needs assessment (CHNA), we identified areas that we could address using our resources, expertise and community partners. Through these actions and relationships, we aim to empower our community and fulfill our mission of “Living God’s love by inspiring health, wholeness and hope.”

The results of the CHNA guided this creation of this document and aided us in how we could best provide for our community and the vulnerable among us. This Implementation Strategy summarizes the plans for Adventist Health Hanford & Selma to develop and collaborate on community benefit programs that address prioritized health needs identified in its 2019 CHNA. Adventist Health Hanford & Selma has adopted the following priority areas for our community health investments.

#### Prioritized Health Needs – Planning to Address

Health Priority #1: Access to Care

Health Priority #2: Obesity/Healthy Eating Active Living (HEAL)/Diabetes

Health Priority #3: Mental Health

Health Priority #4: Economic Security/Homelessness

Health Priority #5: Maternal Infant Health

Building a healthy community requires multiple stakeholders working together with a common purpose. We invite you to explore how we intend to address health challenges in our community and partner to achieve change. More importantly, we hope you imagine a healthier region and work with us to find solutions across a broad range of sectors to create communities that define the well-being of people.

The purpose of the CHNA was to offer a comprehensive understanding of the health needs in Adventist Health Hanford & Selma service area and guide the hospital's planning efforts to address those needs.

The significant health needs were identified through an analysis of secondary data and community input. The criteria listed below recognize the need for a combination of information types (e.g., health indicators and primary data) as well as consideration of issues such as practicality, feasibility, and mission alignment. These health needs were prioritized according to a set of criteria that included:

- Addresses disparities of subgroups
- Availability of evidence or practice-based approaches
- Existing resources and programs to address problems
- Feasibility of intervention
- Identified community need
- Importance to community
- Magnitude
- Mission alignment and resources of hospitals
- Opportunity for partnership
- Opportunity to intervene at population level
- Potential Health Need Score
- Severity
- Solution could impact multiple problems

For further information about the process to identify and prioritize significant health needs, please refer to Adventist Health Hanford & Selma CHNA report at the following link:

<https://www.adventisthealth.org/about-us/community-benefit/>

## Adventist Health Hanford & Selma and Adventist Health

Adventist Health Hanford & Selma is an affiliate of Adventist Health, a faith-based, nonprofit integrated health system serving more than 80 communities on the West Coast and Hawaii.

### Vision

Adventist Health will be a recognized leader in mission focus, quality care and fiscal strength.

### Mission Statement

Living God's love by inspiring health, wholeness and hope.

### Adventist Health facilities Include:

- 21 hospitals with more than 3,284 beds
- More than 273 clinics (hospital-based, rural health and physician clinics)
- 13 home care agencies and seven hospice agencies
- Four joint-venture retirement centers
- Compassionate and talented team of 35,000 associates, medical staff physicians, allied health professionals and volunteers.

We owe much of our heritage and organizational success to the Seventh-day Adventist Church, which has long been a promoter of prevention and whole person care. Inspired by our belief in the loving and healing power of Jesus Christ, we aim to bring physical, mental and spiritual health and healing to our neighbors of all faiths. Every individual, regardless of his/her personal beliefs, is welcome in our facilities. We are also eager to partner with members of all faiths to enhance the health of the communities we serve.

Our commitment to quality health care stems from our heritage, which dates to 1866 when the first Seventh-day Adventist healthcare facility opened in Battle Creek, Michigan. There, dedicated pioneers promoted the “radical” concepts of proper nutrition, exercise and sanitation. Early on, the facility was devoted to prevention as well as healing. They called it a sanitarium, a place where patients—and their families—could learn to be well.

More than a century later, the health care system sponsored by the Seventh-day Adventist Church circles the globe with more than 170 hospitals and more than 500 clinics, nursing homes and dispensaries worldwide. And the same vision to treat the whole person—mind, body and spirit—continues to provide the foundation for our progressive approach to health care.

## Summary of Implementation Strategies

### Implementation Strategy Design Process

Stakeholders from the 19 hospital facilities in the Adventist Health System were invited to participate in a Mission Integration Summit on September 26 and 27, 2019. During this two day-long event, participants were introduced to the 2019 Adventist Health Implementation Strategy Template. After the summit, each hospital was invited to participate in a series of technical assistance calls and consultation sessions with representatives from Adventist Health Community Integration and Conduent Health Communities Institute to further develop and refine their implementation strategy.

## Adventist Health Hanford & Selma Implementation Strategy

The implementation strategy outlined below summarizes the strategies and activities by Adventist Health Hanford & Selma to directly address the prioritized health needs. They include:

### Health Need 1: Access to Care

- Transportation to Clinic Appointments
- Provider Recruitment

### Health Need 2: Obesity/ Healthy Eating Active Living (HEAL)/Diabetes

- Diabetes Self-Management classes
- Athletic Training with Hanford Joint Union High School District
- Healthy Eating Education at Outreach Events

### Health Need 3: Mental Health

- Hosting educational sessions for providers (Resilience Documentary & Social Media Luncheons)
- Hosting education sessions for local school districts (Resilience Documentary & Social Media Luncheons)
- Addiction Medicine

### Health Need 4: Economic Security/Homelessness

- Recuperative Board and Care (Kings Gospel Mission)
- Project Homeless Connect/Point in Time Count
- Landlord and Property Manager Quarterly Networking Lunch and Learns Student Internships
- Inspire Hope resource distributions to community partners for those in need

### Health Need 5: Maternal & Infant Health Overall wellbeing

- Free Car Safety Checks

The Action Plan presented below outlines in detail the individual strategies and activities Adventist Health Hanford & Selma will implement to address the health needs identified through the CHNA process. The following components are outlined in detail in the tables below: 1) actions the hospital intends to take to address the health needs identified in the CHNA, 2) the anticipated impact of these actions as reflected in the Process and Outcomes measures for

each activity, 3) the resources the hospital plans to commit to each strategy, and 4) any planned collaboration to support the work outlined.

No hospital can address all the health needs identified in its community. Adventist Health Hanford & Selma is committed to serving the community by adhering to its mission, and using its skills, expertise and resources to provide a range of community benefit programs. This Implementation Strategy does not include specific plan to address the following significant health needs identified in the 2019 CHNA.

#### **Significant Health Needs – NOT Planning to Address**

Climate Change: We feel that this is not what our area of expertise is in and while we are willing to partner with organizations who are engaging in activities to address Climate Change, this is not our top priority at this time.

Substance Abuse/Tobacco- will be addressed through Mental Health, Access to Care, HEAL  
Oral Health – will be addressed through Access to Care

Asthma – will be address through Access to Care

CVD/Stroke – will be addressed through Access to Care and HEAL

HIV/AIDS/STI's – Will be addressed through Access to Care and Maternal/Infant Health

Cancer – will be address through Access to Care and HEAL

Violence/Injury Prevention – will be address through Economic Security/Homelessness,  
Access to Care and Maternal/Infant Health

<b>CBISA Category:</b> (A - Community Health Improvement; E - Cash and In-Kind; F - Community Building; G - Community Benefit Operations) <ul style="list-style-type: none"> <li>A- Community Health Improvement</li> </ul>						

## Connecting Strategy and Community Health

Community health interventions are a key element in achieving the overall goals of reducing the overall cost of health care, improving the health of the population, and improving access to affordable health services for the community both in outpatient and community settings. The key factor in improving quality and efficiency of the care hospitals provide is to include the larger community they serve as a part of their overall strategy.

Health systems must now step outside of the traditional roles of hospitals to begin to address the social, economic, and environmental conditions that contribute to poor health in the communities we serve. Bold leadership is required from our administrators, healthcare providers, and governing boards to meet the pressing health challenges we face as a nation. These challenges include a paradigm shift in how hospitals and health systems are positioning themselves and their strategies for success in a new payment environment. This will impact everyone in a community and will require shared responsibility among all stakeholders.

Community well-being is not just the overall health of a population but also includes the distribution of health equity. Community health can serve as a strategic platform to improve the health outcomes of a defined group of people, concentrating on three correlated stages:

- 1) The distribution of specific health statuses and outcomes within a population;
- 2) Factors that cause the present outcomes distribution; and
- 3) Interventions that may modify the factors to improve health outcomes

Improving community health requires effective initiatives to:

- 1) Increase the prevalence of evidence-based preventive health services and preventive health behaviors,
- 2) Improve care quality and patient safety and
- 3) Advance care coordination across the care continuum

Adventist Health is on a bold journey to establish sustainable significance with a vibrant mission of living God's love by inspiring health, wholeness and hope. We will advocate for and lead change in healthcare and social policy to benefit the under privileged and the disenfranchised in the diverse communities to which we have been called.

Together we will create lasting impact in people's whole lives and affect profound improvement in the well-being of the entire community.
