Adventist Health Tehachapi Valley
2021 Community Health Plan

The following Implementation Strategy serves as the 2020 – 2022 Community Health Plan for Adventist Health Tehachapi Valley and is respectfully submitted to the Office of Statewide Health Planning and Development on May 27th, 2022 reporting on 2021 results.
Executive Summary

Introduction & Purpose
Adventist Health Tehachapi Valley is pleased to share its Community Health Implementation Strategy. This follows the development of its 2019 Community Health Needs Assessment (CHNA) in accordance with requirements in the Affordable Care Act and IRS 990 Schedule H requirements and approved by the Adventist Health Board of Directors on October 17, 2019.

After a thorough review of the health status in our community through the community health needs assessment (CHNA), we identified areas that we could address using our resources, expertise and community partners. Through these actions and relationships, we aim to empower our community and fulfill our mission of “Living God’s love by inspiring health, wholeness and hope.”

The results of the CHNA guided this creation of this document and aided us in how we could best provide for our community and the vulnerable among us. This Implementation Strategy summarizes the plans for Adventist Health Tehachapi Valley to develop and collaborate on community benefit programs that address prioritized health needs identified in its 2019 CHNA. Adventist Health Tehachapi Valley has adopted the following priority areas for our community health investments.

<table>
<thead>
<tr>

Building a healthy community requires multiple stakeholders working together with a common purpose. We invite you to explore how we intend to address health challenges in our community and partner to achieve change. More importantly, we hope you imagine a healthier region and work with us to find solutions across a broad range of sectors to create communities that define the well-being of people.
The purpose of the CHNA was to offer a comprehensive understanding of the health needs in Adventist Health Tehachapi Valley service area and guide the hospital’s planning efforts to address those needs.

The significant health needs were identified through an analysis of secondary data and community input. The health needs were prioritized according to a set of criteria that included:

- The perceived severity of a health issue or health factor as it affects the health and lives of those in the community.
- The level of importance the hospital should place on addressing the issue.

**Secondary Data Collection**
Secondary data were collected from a variety of local, county and state sources to present a community profile, social determinants of health, health care access, birth indicators, leading causes of death, acute and chronic disease, health behaviors, mental health, substance use and misuse, and preventive practices. When available, data sets were presented in the context of Kern County and California to help frame the scope of an issue, as it relates to the broader community.

Sources of data included: the U.S. Census American Community Survey, California Department of Public Health, California Health Interview Survey, Kern County Public Health Department, Healthy Kern County, County Health Rankings, California Department of Education, California Office of Statewide Health Planning and Development and California Department of Justice, among others.

**Primary Data Collection**
For the CHNA, information was obtained through community surveys and interviews with individuals who are leaders and/or representatives of medically underserved, low income, and minority populations, local health or other departments or agencies that have current data or other information relevant to the health needs of the community.

**Interviews**
Interviews were used to gather information and opinions from persons who represent the community served by the hospital. Given shared community areas, area hospitals worked together to conduct the interviews. Forty-one (41) interviews were completed from October 2018 through March 2019.

The area hospitals and collaborators developed a list of key influencers who have knowledge of community health and social needs. They were selected to cover a wide range of communities within Kern County, represent different age groups, racial/ethnic populations and
underserved populations. The identified stakeholders were invited by email to participate in a phone interview. Appointments for the interviews were made on dates and times convenient to the stakeholders. At the beginning of each interview, the purpose of the interview in the context of the assessment was explained, the stakeholders were assured their responses would remain confidential, and consent to proceed was given. Interview participants were asked to share their perspectives on several topics related to the identified preliminary health needs in the community area. Questions focused on the following topics:

- Major health issues facing the community.
- Socioeconomic, behavioral, environmental or clinical factors that contribute to poor health in a community.
- Issues, challenges, barriers faced by community members as they relate to the identified health needs.
- Services, programs, community efforts, resources available to address the health needs.
- Special populations or groups that are affected by a health need.
- Health and social services missing or difficult to access in the community.
- Other comments or concerns.

**Community Survey**

Hospital partners collaborating on the CHNA developed a plan for distribution of a survey to engage community residents. The survey was available in an electronic format through a Survey Monkey link, and in a paper copy format. The electronic and paper surveys were available in English and Spanish. The surveys were available from November 2018 to January 2019 and during this time, 1,114 usable surveys were collected.

Members of the hospitals distributed the surveys to their clients, in hospital waiting rooms and service sites, and through social media, including posting the survey link on hospital Facebook pages. The survey was also distributed to community partners who made them available to their clients. A written introduction explained the purpose of the survey and assured participants the survey was voluntary, and they would remain anonymous. For community members who were illiterate, an agency staff member read the survey introduction and questions to the client in his/her preferred language and marked his/her responses on the survey.

The survey asked for respondents’ demographic information. Survey questions focused on the following topics:

- Biggest health issues in the community.
- Greatest needs facing children and families.
- Where residents and their families receive routine health care services.
- Problems faced accessing health care, mental health care, dental care or supportive services.
• What would make it easier to obtain care?
• Types of support or services needed in the community.
• Safety concerns in the community

For further information about the process to identify and prioritize significant health needs, please refer to Adventist Health Tehachapi Valley CHNA report at the following link:

https://www.adventisthealth.org/about-us/community-benefit/

Adventist Health Tehachapi Valley and Adventist Health
Adventist Health Tehachapi Valley is an affiliate of Adventist Health, a faith-based, nonprofit integrated health system serving more than 80 communities on the West Coast and Hawaii.

Vision
Adventist Health will be a recognized leader in mission focus, quality care and fiscal strength.

Mission Statement
Living God’s love by inspiring health, wholeness and hope.

Adventist Health Includes:
(as of July 1, 2020)

• 23 hospitals with more than 3,600 beds
• 290 clinics (hospital-based, rural health and physician clinics)
• 15 home care agencies and eight hospice agencies
• Three retirement centers & one continuing care retirement community
• A workforce of 37,000 including associated, medical staff physicians, allied health professionals and volunteers

We owe much of our heritage and organizational success to the Seventh-day Adventist Church, which has long been a promoter of prevention and whole person care. Inspired by our belief in the loving and healing power of Jesus Christ, we aim to bring physical, mental and spiritual health and healing to our neighbors of all faiths. Every individual, regardless of his/her personal beliefs, is welcome in our facilities. We are also eager to partner with members of all faiths to enhance the health of the communities we serve.
Our commitment to quality health care stems from our heritage, which dates to 1866 when the first Seventh-day Adventist healthcare facility opened in Battle Creek, Michigan. There, dedicated pioneers promoted the “radical” concepts of proper nutrition, exercise and sanitation. Early on, the facility was devoted to prevention as well as healing. They called it a sanitarium, a place where patients—and their families—could learn to be well.

More than a century later, the health care system sponsored by the Seventh-day Adventist Church circles the globe with more than 170 hospitals and more than 500 clinics, nursing homes and dispensaries worldwide. And the same vision to treat the whole person—mind, body and spirit—continues to provide the foundation for our progressive approach to health care.

Summary of Implementation Strategies

Implementation Strategy Design Process

Stakeholders from the 19 hospital facilities in the Adventist Health System were invited to participate in a Mission Integration Summit on September 26 and 27, 2019. During this two day-long event, participants were introduced to the 2019 Adventist Health Implementation Strategy Template. After the summit, each hospital was invited to participate in a series of technical assistance calls and consultation sessions with representatives from Adventist Health Community Integration and Conduent Health Communities Institute to further develop and refine their implementation strategy.

Adventist Health Tehachapi Valley Implementation Strategy

The implementation strategy outlined below summarizes the strategies and activities by Adventist Health Tehachapi Valley to directly address the prioritized health needs. They include:

- **Health Need 1: Chronic Diseases**
  - Cancer Outreach/Screening
  - Heart Disease Outreach/Screening
- **Health Need 2: Food Insecurity**
  - Waste Hunger Not Food
- **Health Need 3: Preventative Practices**
  - Childhood Mobile Immunization Program
- **Health Need 4: Violence and Injury**
  - Suicide Intervention Program
- **Health Need 5: Housing and Homelessness**
  - Financial/Volunteer support of the Homeless Point in Time Count
  - Data/Program Analytics as part of the Homeless Action Planning Committee
• Health Need 6: Economic Insecurity
  o Tattoo Removal

The Action Plan presented below outlines in detail the individual strategies and activities Adventist Health Tehachapi Valley will implement to address the health needs identified through the CHNA process. The following components are outlined in detail in the tables below: 1) actions the hospital intends to take to address the health needs identified in the CHNA, 2) the anticipated impact of these actions as reflected in the Process and Outcomes measures for each activity, 3) the resources the hospital plans to commit to each strategy, and 4) any planned collaboration to support the work outlined.

No hospital can address all the health needs identified in its community. Adventist Health Tehachapi Valley is committed to serving the community by adhering to its mission, and using its skills, expertise and resources to provide a range of community benefit programs. This Implementation Strategy does not include specific plan to address the following significant health needs identified in the 2019 CHNA.

<table>
<thead>

<tr>
<td>• Alzheimer’s disease-Need being addressed by others</td>
</tr>
<tr>
<td>• Overweight and Obesity-Need being addressed by others</td>
</tr>
</tbody>
</table>

COVID 19 Considerations

The COIVD-19 global pandemic has caused extraordinary challenges for Adventist Health hospitals and health care systems across the world including keeping front line workers safe, shortages of protective equipment, limited ICU bed space and developing testing protocols. They have also focused on helping patients and families deal with the isolation needed to stop the spread of the virus, and more recently vaccine roll out efforts.
Adventist Health, like other health care systems, had to pivot its focus to meet the most urgent healthcare needs of its community during the pandemic, as well as reassess the ability to continue with some community health strategies due public health guidelines for social distancing. Adjustments have been made to continue community health improvement efforts as possible, while ensuring the health and safety of those participating. The Strategy Action Plan Grids on the following pages reflect updated activities for each strategy.

In FY21, Adventist Health as a system took the following actions in response to the needs created or exacerbated by COVID-19:

- Began offering more virtual health care visits to keep community members safe and healthy
- Developed an online symptom tracker to help community members determine if they may have COVID-19 or some other flu type illness and what steps to take
- Was part of a communitywide effort by the local health system to vaccinate eligible community members to help stop the spread of the virus

Locally, Adventist Health Tehachapi Valley took these additional actions:

- Partnered with Kern County Public Health to provide free COVID-19 testing to the community.
- Donated over twenty-three thousand face masks to local and rural community-based organizations, senior centers, and school districts.
- Initiated a COVID-19 vaccination program and expanded the effort to the community.
# Adventist Health Tehachapi Valley Implementation Strategy Action Plan

## PRIORITY HEALTH NEED: CHRONIC DISEASES

## GOAL STATEMENT: REDUCE THE IMPACT OF CHRONIC DISEASES IN AT RISK COMMUNITIES., INCREASE PREVENTION AND AWARENESS

**Mission Alignment:** (Well-being of People; Well-being of Places; Equity) Well-being of people

**Strategy:** Increase prevention and awareness activities in targeted zip codes.

Implementation Strategy 9
PRIORITY HEALTH NEED: CHRONIC DISEASES

| community events. |

Source of Data:  
- AIS Cancer Center, County of Kern Public Health Department

Target Population(s):  
- Rural zip codes, Zip codes with abnormally high rates of heart disease or cancer

Adventist Health Resources: (financial, staff, supplies, in-kind etc.)  
- Financial, supplies, in-kind

Collaboration Partners: (place a “∗” by the lead organization if other than Adventist Health)  
- American Heart Association, American Cancer Society.

CBISA Category: (A - Community Health Improvement; E - Cash and In-Kind; F - Community Building; G - Community Benefit Operations)

A2 - Community Based Clinical Services

Strategy Results 2021:

- In the summer of 2021, we screened over ninety children in Mojave and California City providing sports physicals and health screening assessments.
- At the Tehachapi Farmer’s Market, we participated in healthcare conversation, provided vaccines, discussed healthy eating habits, provided health screenings, or other behavioral health strategies to over five-thousand community members.
- Cancer screenings were provided, colon cancer testing kits to over one-hundred community members. Discussed signs and symptoms of breast cancer and how to give a self-examination at home for on-going preventative care.
- Hosted numerous blood drives in 2021 which provided free cholesterol screenings to all participants. Over two-hundred unique encounters were seen in 2021.
- Participated in National Night Out in Tehachapi where over one-hundred people were seen and provided with healthcare prevention information along with information addressing behavioral health.
- The Tehachapi PRIDE event saw seventy-five participants discuss substance abuse and addiction therapy reduction strategies and receive education on understanding our key drivers to mental health conditions with substance abuse.
## PRIORITY HEALTH NEED: FOOD INSECURITY

**GOAL STATEMENT:** REDUCE SURPLUS FOOD WASTE AND IMPROVE DISTRIBUTION TO THOSE IN NEED

**Mission Alignment:** (Well-being of People; Well-being of Places; Equity) Well-being of people

**Strategy 1.1:** Partner with Kern Public Health ‘Waste Hunger Not Food’ to take edible, surplus food to distribute to those in need

**Programs/Activities**

**Source of Data:**
- Kern County Public Health

**Target Population(s):**
- Food insecure families, adults

**Adventist Health Resources:** (financial, staff, supplies, in-kind etc.)
- In-kind

**Collaboration Partners:** (place a “*” by the lead organization if other than Adventist Health)
- *Kern County Public Health, City Serve Kern County

**CBISA Category:** (A - Community Health Improvement; E - Cash and In-Kind; F - Community Building; G - Community Benefit Operations)

**E3-In-kind Donations**

**Strategy Results 2021:**
- Throughout 2021, AHTV continued to collaborate and build relationships to provide much need resources to food insecure community members. Activities included the following: food boxes for senior citizens, information and education to local sourcing programs that provide income qualified residents with free food, financial support for community members during the holiday season, and partnered with College Community Services and Community Action Partnership of Kern County to provide free food disbursement and enrollment to assist patiented who were identified as food insecure.
PRIORITY HEALTH NEED: PREVENTATIVE PRACTICES

GOAL STATEMENT: REDUCE THE RATE OF UNVACCINATED AND UNDER VACCINATED KIDS AGES 0-5 AND DECREASE THE RISK FOR OUTBREAKS OF VACCINE-PREVENTABLE DISEASES THROUGHOUT THE COMMUNITY

Mission Alignment: (Well-being of People; Well-being of Places; Equity) Well-Being of People

Strategy: Utilize grant funding to provide free flu and childhood immunizations to Kern County residents through a specially equipped mobile unit and provide COVID and Flu vaccinations to Kern County residents through a specially equipped mobile van

- Children’s Mobile Immunization Program, County of Kern Public Health

Target Population(s):
- Children, especially those ages 0-5.

Adventist Health Resources: (financial, staff, supplies, in-kind etc.)
- Financial, supplies, in-kind, staff support

Collaboration Partners: (place a “*” by the lead organization if other than Adventist Health)
- County of Kern, State of California, First5 Kern, CAPK, Kern Health Systems

CBISA Category: (A - Community Health Improvement; E - Cash and In-Kind; F - Community Building; G - Community Benefit Operations)
- A2 - Community Based Clinical Services

Strategy Results 2021:
- Our mobile unit launched in 2021 and provided primary care services in Tehachapi. Due to outreach an increase of access to care services were provided to rural areas within the county. The pediatric immunization mobile program provided vaccine services to elementary school children. Additionally, the COVID mobile vaccine program has provided over 5,000 vaccines.
**PRIORITY HEALTH NEED: VIOLENCE AND INJURY**

**GOAL STATEMENT:** IMPLEMENT RESEARCH-INFORMED COMMUNICATION EFFORTS DESIGNED TO PREVENT SUICIDE BY CHANGING KNOWLEDGE, ATTITUDES, AND BEHAVIORS.

**Mission Alignment:** (Well-being of People; Well-being of Places; Equity) Well-being of people

**Strategy 1.1:** Hold Question, Persuade, refer (QPR) Training to provide common suicide myths and facts; warning signs of suicide, tips for asking the suicide question, methods for persuading suicidal individuals to get help, and how to refer at-risk people for help.

**CBISA Category:** (A - Community Health Improvement; E - Cash and In-Kind; F - Community Building; G - Community Benefit Operations)
- A1-Community Health Education

**Strategy Results 2021:**
- We enrolled over one-hundred and fifty patients into the behavioral health program addressing mental health and substance abuse disorders. Throughout the year AHTV hosted 10 behavioral health presentations throughout East Kern County, with 15% of people enrolled seeing an increased in overall wellness.
# PRIORITY HEALTH NEED: HOUSING AND HOMELESSNESS

## GOAL STATEMENT:
WORK HAND-IN-HAND WITH COMMUNITY PARTNERS TO DELIVER A METRIC-DRIVEN STRATEGY TO REDUCE CHRONIC HOMELESSNESS ACROSS THE COUNTY.

### Mission Alignment:
(Well-being of People; Well-being of Places; Equity) Well-being of people, Equity

### Strategy:
Partner with existing organizations in the Kern County to support accurate homeless counts, data sharing and grant funding opportunities

<table>

### CBISA Category:
(A - Community Health Improvement; E - Cash and In-Kind; F - Community Building; G - Community Benefit Operations)
PRIORITY HEALTH NEED: HOUSING AND HOMELESSNESS

- A1-Community Health Education

Strategy Results 2021:

- The Bakersfield-Kern Regional Homeless Collaborative (BKRHC) in partnership with Adventist Health sponsoring the Point in time count, also known as the Bakersfield/Kern County Continuum of Care (COC) CA-604, completed the annual 2021 Point-in-Time Count following guidance from the U.S. Department of Housing and Urban Development (HUD) for those who are sheltered and unsheltered. There was a total of 2,150 unduplicated persons sleeping in shelters and unsheltered on January 27, 2021. The PIT Count resulted in 569 persons who were sleeping in shelters and 1,581 who were unsheltered.

- Adventist Health launched the homeless prevention and homeless ESG grant program in the fall of 2021. The program screened patients, aligned patients with rapid re-housing and hotels stays to vulnerable patients. The program offers case management services to assist in the process of finding permanent housing solutions along with emergent housing.
PRIORITY HEALTH NEED: ECONOMIC INSECURITY

GOAL STATEMENT: IMPROVE THE SOCIAL AND PHYSICAL WELL-BEING OF ITS RESIDENTS BY DECREASING BARRIERS TO EMPLOYMENT.

Mission Alignment: (Well-being of People; Well-being of Places; Equity) Well-being of Places, Equity

Strategy 1: Support efforts to reduce barriers to employment for those recently released from incarceration.
Strategy 2: Align community work to include well-being related to economic security

Programs/Activities | Process Measures | Results: Year 1 | Short Term Outcomes | Results: Year 2 | Medium Term Outcomes | Results: Year 3
---|---|---|---|---|---|---
Activity 1.1 | Provide administrative and volunteer staff for a medical tattoo removal program with Garden Pathways | # of mentorship participants who have tattoos removed | Due to COVID-19, non-essential programs we paused to follow the COVID-19 guidelines. Program is expected to relaunch in 2021. | -# of mentees who gain employment post program participation | See Narrative Below | % of mentees employed 2 years post program participation

Source of Data:
- Adventist Health HP, Bakersfield College, Garden Pathways Program Data, Kern Economic Development Corporation

Target Population(s):
- Recently Incarcerated, Homeless

Adventist Health Resources: (financial, staff, supplies, in-kind etc.)
- In-Kind, Financial

- *Garden Pathways

CBISA Category: (A - Community Health Improvement; E - Cash and In-Kind; F - Community Building; G - Community Benefit Operations)
- F8-Workforce Development

Strategy Results 2021:
- Adventist Health partnered with Garden Pathways to align recently released inmates to job retraining programs. This will reduce the unemployment numbers of inmates released.
- Over 150 were seen in the tattoo removal program to remove employment barriers and stigmas around tattoos.
The Adventist Health + Blue Zones Solution

Our desire to improve community well-being grew out of not only our mission at Adventist Health - to live God’s love by inspiring health, wholeness and hope – but also by the sheer need as seen across our system of 23 hospitals. Overwhelmingly, we see issues related to health risk behaviors, mental health and chronic illnesses throughout the communities we serve. That is why we have focused our work around addressing behavior and the systems preventing our communities from achieving optimal health.

In an effort to meet these needs, our solution is to create a sustainable model of well-being that measurably impacts the well-being of people, well-being of places and equity.

In 2020, Adventist Health acquired Blue Zones as the first step toward reaching our solution. By partnering with Blue zones, we will be able to gain ground in shifting the balance from healthcare – treating people once they are ill – to transformative well-being – changing the way communities live, work and play. In 2021, Adventist Health committed to launching six Blue Zone Projects within our community footprint, and as we enter 2022 these projects are active. Blue Zone Projects are bringing together local stakeholders and international well-being experts to introduce evidence-based programs and changes to environment, policy and social networks. Together, they measurably improve well-being in the communities we serve.
